1.0 INTRODUCTION

The East African Business Council (EABC), in collaboration with implementing partners and expert consultants, organised a series of three online webinars under the Business Scouts Fund and EABC Project titled "Enhancing Competitiveness of Agri-food Industry and Mitigating the Impact of Global Crises to Improve Food Security in the EAC Region." These webinars aim to address critical issues related to smart agriculture, post-harvest losses, and sustainable agriculture practices in the East African Community (EAC).

2.0 OBJECTIVE OF THE WEBINARS ON THE SMART AGRICULTURE AND POST HARVEST LOSSES REDUCTION

The primary objectives of these webinars are as follows:

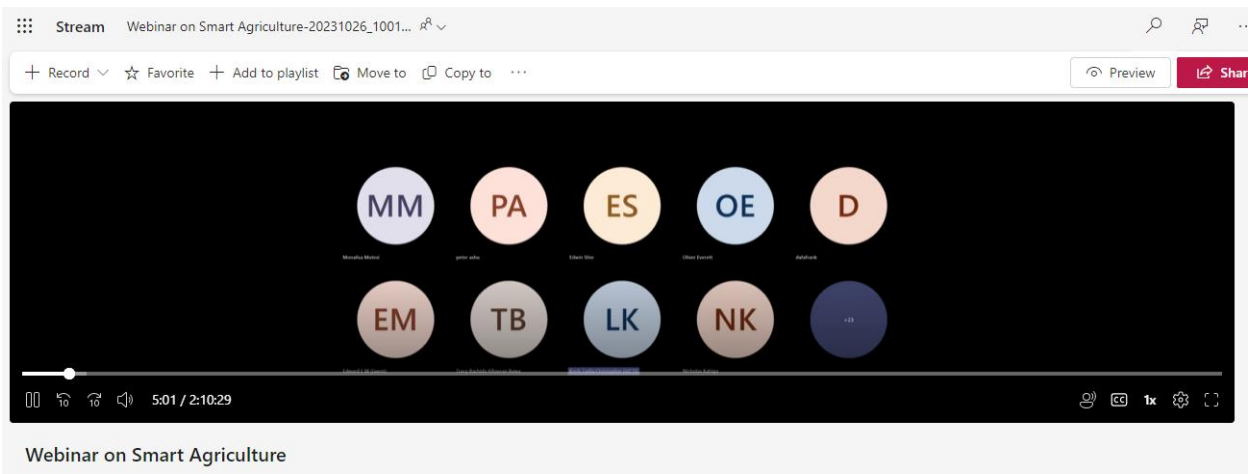

- i. To build the capacities of Agri-actors within the EAC region, including government officials, agribusinesses, women, SMEs, and youth, in key areas of agri-food industry competitiveness.
- ii. To explore practical case studies and working solutions in agriculture, with a focus on smart agriculture, post-harvest loss reduction, and sustainable agriculture practices.
- iii. To facilitate matchmaking opportunities for stakeholders in technology transfer and adaptation within the agri-food sector.

3.0 PARTICIPANTS

Both webinars on Smart Agriculture and Post Harvest Losses convened **more than 250 Agri-Value chain stakeholders** from the Agri-Value chains. The list of stakeholders for both webinars is attached as an appendix.

4.0 OPENING REMARKS

4.1 Smart Agriculture

Ms. Lydia Koch, Business Scouts for Development Programme Private Sector Advisor, extended her heartfelt gratitude to the East African Business Council (EABC), for organising a webinar on Smart Agriculture. She said that this webinar is part of a joint

project implemented under the Business Scouts Fund, aimed at enhancing food security in EAC. She highlighted that Business Scouts for Development is facilitated by GiZ on behalf of the German Government through the Ministry of Economic Cooperation and Development. She said that a core strategic focus of this initiative is the development of sustainable Agri-food systems to improve the food value chain effectively and efficiently.

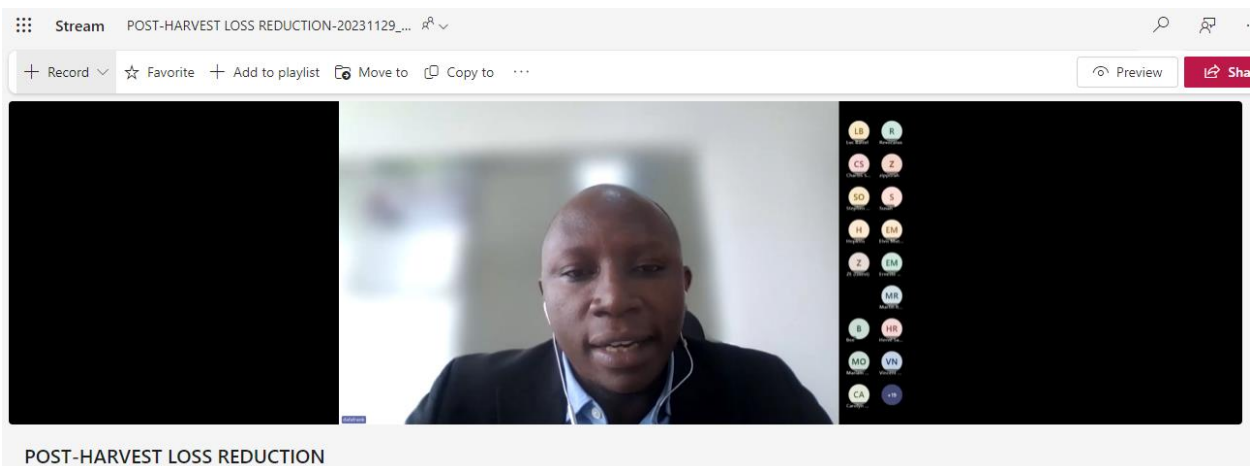

Ms Koch further stated that in the face of crises and challenges, such as climate change, drought, and supply chain disruptions due to the pandemic and ongoing conflicts, agriculture remains a crucial sector in East Africa. This sector not only provides sustenance to families but also generates employment for smallholder farmers, youth, and women. Recognising the multifaceted challenges, a collaborative approach becomes imperative.

She said that as we navigate through the impacts of climate change, it is evident that a concerted effort is required to empower smallholder farmers, enabling them to adapt and engage in smart, sustainable farming practices. She stated that the webinar on Smart Agriculture is a catalyst for fostering innovation and transforming the agriculture and food system in East Africa. It serves as a platform to explore best practices and utilise technology to secure a sustainable agriculture value chain.

In collaboration with the East African Community (EAC) and other stakeholders in the agriculture sector, Ms Koch said that SEQUA is committed to addressing the challenges at hand. The webinar on Smart Agriculture is just the beginning of a series focused on various topics, aiming to engage in discussions, share experiences, and promote best practices within the agriculture value chain.

She ended her welcoming remarks by encouraging all participants to actively contribute, fostering an environment of engagement, interaction, and knowledge sharing. Together, let us embark on this journey to build a resilient and sustainable future for agriculture in East Africa.

4.2 Post Harvest Loss Reduction

Mr. Frank Dafa, Manager of Policy, Standards, SPS, and NTBs at the East African Business Council, emphasised the organisation's dedication to building on previous successes and leveraging comprehensive studies. EABC shares insights from two pivotal research projects—one addressing the impact of global crises and the other focusing on investment opportunities in the agricultural value chain.

Mr. Dafa said that the first study conducted by EABC delved into the ramifications of global crises, providing a comprehensive understanding of challenges and opportunities for the agri-food industry. The second study explored investment prospects within the selected value chain, with a specific emphasis on the Belgian leguminous plant. Policy briefs summarizing these studies are now available on the EABC website www.eabc-online.com offering valuable recommendations and findings.

He further said that, by identifying two critical areas for specialised training in the region, EABC utilized the Masters Training of Trainers program to conduct consecutive national training sessions across various partner countries. The training covered topics such as EAC export procedures and contract farming, empowering participants to enhance their competitiveness and contribute to global security efforts.

As part of its commitment to knowledge dissemination, EABC initiated a series of webinars. Today marks the second of three webinars planned for the coming months. The first, held in October 2023, delved into Smart Agriculture. The current webinar focuses on post-harvest loss reduction, with the third and final scheduled for January 2024, revolving around sustainable agriculture. On behalf of EABC, he encourages all interested parties to attend and register for these informative sessions, where the latest innovations and technologies to combat global climate change will be showcased.

He further invited attendees to mark their calendars for an upcoming webinar on January 25th. Additionally, EABC is excited to announce a High-Level E-conference on food security on December 13th, featuring key stakeholders from the public and private sectors. This online event promises insightful discussions and collaborative initiatives to address pressing challenges in food security.

EABC extends its warmest welcome to all participants and encourages active engagement in these knowledge-sharing endeavours.

5.0 WEBINAR SESSIONS

5.1 Smart Agriculture

The first session of the webinar on Smart Agriculture focusing on Virtual Agronomist was delivered by Ms. Monalisa Mutesi who is a Country Director for iSDA. Ms. Mutesi presented on the advanced soil analysis tools (Virtual Agronomist) which is a science-based nutrient management advisory for small-holder farmers. Virtual Agronomist generate soil properties analysis and tailored recommendations to enable farmers to determine the precise nutrients needed for the soil by quality and quantity to optimise yields.

SDA provides support to smallholder farmers across Africa to increase their productivity using advanced technologies while also improving the profitability and well-being of their communities.

Participants also learnt basic tips for small farmers presented by Mr David Runge from Tamu Tamu Ltd. Mr Runge presented on the sustainability of a structured approach in developing a temperate fruit value chain.

5.2 Post-Harvest Loss Reduction

The training on Post-Harvest Loss Reduction was delivered by Mr. Zablon Ernest who is a Post Harvest Specialist from the World Vegetable Centre (WorldVeg). Zablon covered an exploration of the occurrence and causes of post-harvest losses, the impact of such losses on food security and economics, effective post-harvest management practices, and the implementation of advanced post-harvest technologies and operations.

The webinar also heard a presentation from Mr Erick Kumari from TEC Dakawa Farm. Mr Kumari presented on available solutions to address post-harvest losses in the region.

Both Webinars delivered insightful sessions, equipping participants with knowledge and tools to address critical challenges in agriculture, from soil management to post-harvest processes.

6.0 POST-WEBINAR EVALUATION

The following are the comments from the participants of webinars on smart agriculture and post-harvest loss reduction.

6.1 Smart Agriculture Survey

Chart 1: 100% of respondents said that the training had impacted their knowledge of Smart Agriculture

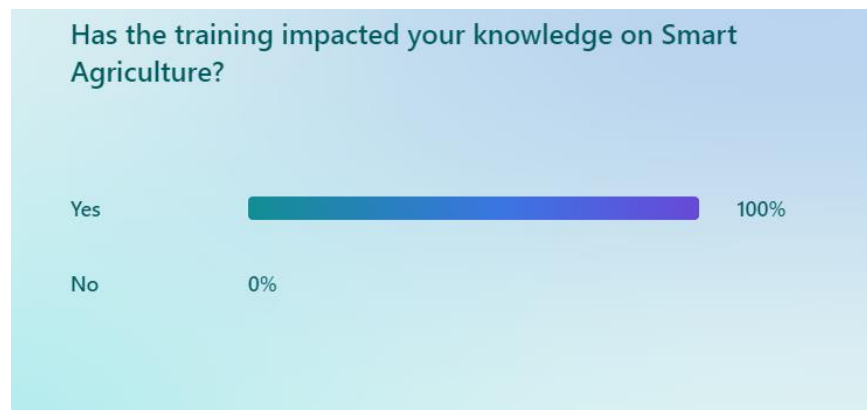

Chart 2: 92% of the respondents said that the training and materials provided were relevant while 7% said they were not relevant.

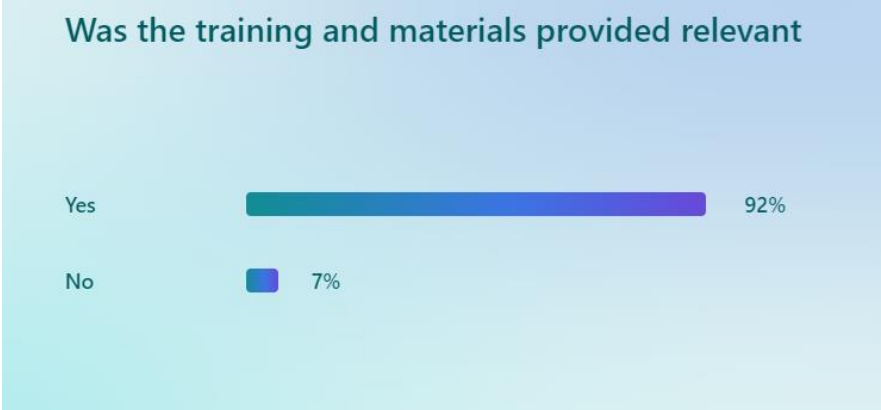

Chart 3: 92% of the respondents said that they would like to make follow up with the presenters.

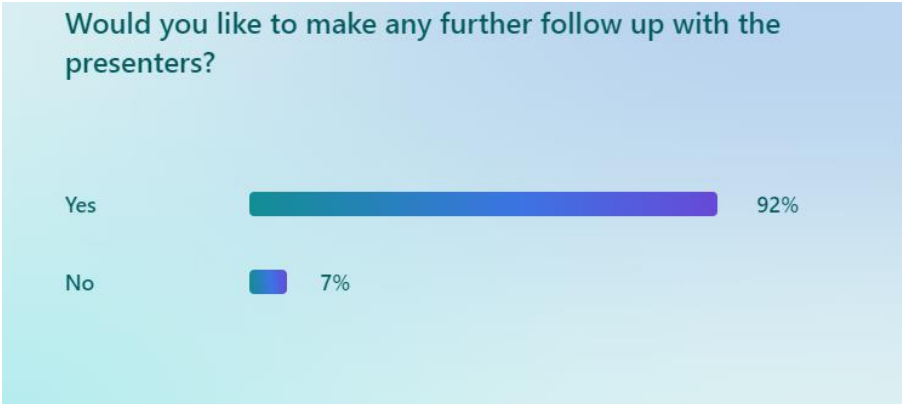

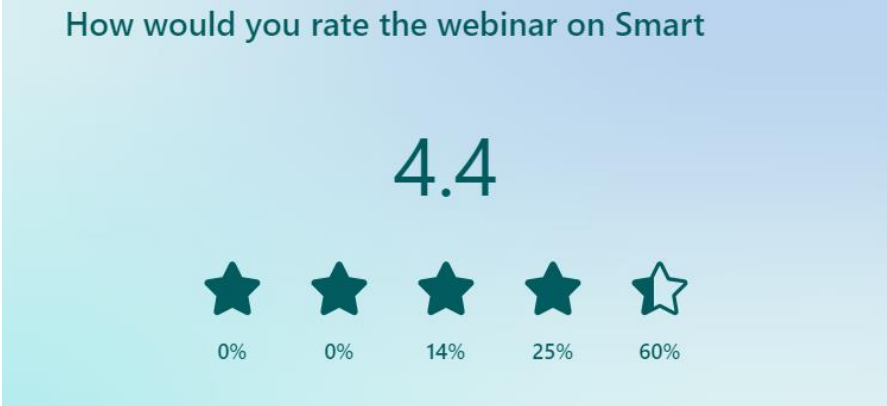

Chart 4: The overall webinar on Smart Agriculture was rated 4.4 out of 5.

6.2 Post-Harvest Loss Reduction

Chart 1: 100% of the respondents said that the training on Post Harvest Losses has impacted their knowledge.

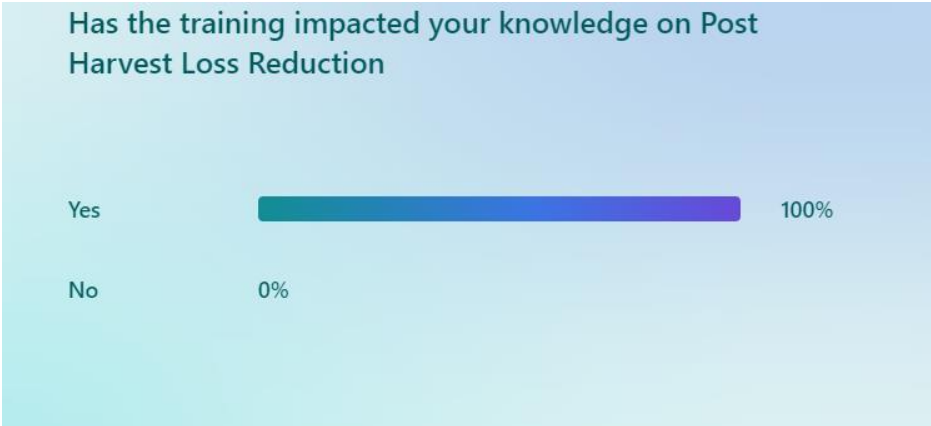

Chart 2: 100% of the respondents said that the materials provided were relevant.

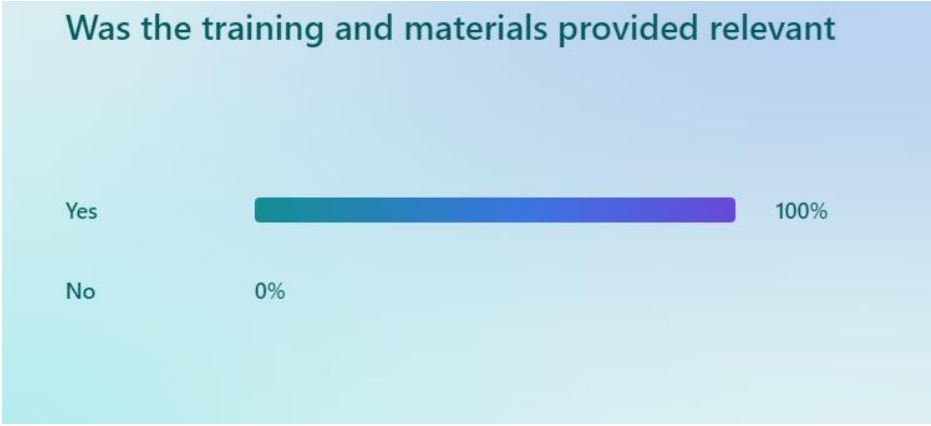

Chart 3: 100% of the respondents said that they would like to follow up with the presenters

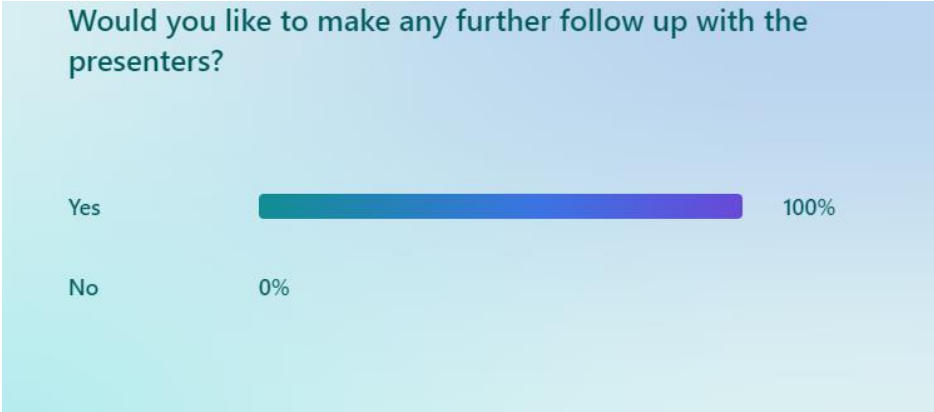

Chart 8: The overall webinar on Post-Harvest Loss Reduction was rated 4.6 out of 5

7.0 APPENDIX

REGISTRATION LISTS OF CAPACITY-BUILDING WEBINAR STAKEHOLDERS

SMART AGRICULTURE					
No.	Registration first name	Registration last name	Registration email	Organization	Gender
